

EDITORIAL COMMENTS.

Lassen volcano is still at it.

Billy Sunday's meeting at Paterson, N. J., resulted in 17,000 conversions.

After 50 years, the thin ranks of veterans in gray are once more in Richmond.

The Italians have seized Rhodes. Well, why not? All Rhodes formerly led to Rome.

A Kansas woman weighing 587 pounds has just married a man weighing 118 pounds.

Count Tolstoi's son who tunneled his way out of an Austrian military prison, has been recaptured.

The Austrians are trying to put back the silent letters into the name Przemysl, discarded by the Russians as useless.

One of the British steamers sunk by the Germans last week was the Spennmore. At any rate, the name represented something.

There are 2,256 delegates in the Republican convention at Lexington June 16. Christian with 46 has more delegates than any county except Jefferson.

Knox Booth, revenue agent at Nashville, has been missing for several days and is wanted on a charge of conspiracy to defraud the government.

W. M. Byrd, of Mineral Wells, Texas, has asked the government to investigate the reported execution of his son, W. M. Byrd, Jr., by Mexican soldiers at Tampico.

Theophile Braga, who was Provisional President of Portugal following the revolution which drove out King Manuel, was Saturday elected President of the republic.

Most of the newspapers of Kentucky are giving the candidates a square deal by letting them exploit themselves in the advertising columns. As a result many have been lost in the shuffle.

Becker, under sentence to die July 12, says he wants his wife to cease efforts to save him, by an appeal for clemency. "I'm through; don't want anything done. Have lost faith in God and man," he said.

The English battleships do not always live up to their names. Those sunk by the Germans to date are, the "Invincible," the "Goliath," the "Majestic," the "Triumph," the "Audacious," and the "Bulwark."

No bodies of the 21 officers and crew of the submarine F-4 were found in the forward hold of the vessel when a diver entered it Friday. The vessel is in water 24 feet deep and the bodies are supposed to be in another compartment.

Madame Kokovtseva, a Russian woman, was recently commanding the 6th Ural Cossack regiment and is called the "Russian Joan of Arc" and has been twice wounded while fighting.

Prisoners taken by Russian armies and interned in Russia up to the first of April, according to figures made public Sunday, number 10,734 officers and 605,378 men. In addition the statement says, great numbers of Galicia prisoners have been found and sent home.

Young Woman Suicides.

Miss Leslie Robertson, daughter of the late Sam Robertson, who lives in Trigg county, committed suicide by jumping into a cistern on the farm of Robert Hall in that county. Miss Robertson was about 30 years old and an attractive and popular young woman, and no reason has been advanced or given for her act.

GERMANY'S ANSWER IS AVASIVE

Waits Two Weeks, Then Dodges a Direct Answer to Lusitania Note.

PRESIDENT WILL STAND PAT. Hint That We Are On Verge of Breaking off Diplomatic Relations.

Washington, May 31.—Germany's reply to the American note sent after the sinking of the Lusitania was delivered to Ambassador Gerard at Berlin Saturday. It does not specifically answer the American representations concerning the sinking of the liner, nor the demand for the discontinuance of submarine warfare on merchant vessels. These points are left for further negotiations. The Berlin note expresses regret for attacks on American vessels, which are said to have been unintentional. Compensation is offered in cases where Germany is shown to have been at fault. The note charges, as a basis of negotiations, that the Lusitania was a British naval auxiliary, carrying mounted guns as well as troops and munitions. The United States is asked what steps have been taken, if any, to induce Great Britain to depart from its policy of cutting off Germany's importations of food supplies.

The aversive nature of the reply has produced a feeling of profound disappointment here. Dissatisfaction at the failure of Germany to answer the demands of the United States was reflected in government circles generally.

There was little concealment anywhere that the answer from Berlin had produced a grave situation in the relations between United States and Germany.

The official text from Ambassador Gerard will be placed before the President early today. There will be a cabinet meeting Tuesday.

PROMPT ANSWER EXPECTED.

From a previous knowledge of President Wilson's position, it was generally predicted that a prompt answer would be sent to Berlin, perhaps within 24 to 48 hours. This is expected to give the American government understanding of the facts, that the Lusitania was unarmed and carried no concealed guns, that she sailed from the United States a peaceful merchantman, and that under all rules of international law and humanity, the vessel should have been visited and searched and her passengers transferred to a place of safety, whether she carried ammunition or not. American law does not prohibit ammunition from being carried on passenger ships, it will be asserted, but only self-explosive material, and liners in the past have been permitted to carry arms and ammunition by special ruling of the state department of the meaning of federal statutes.

United States will answer Germany's requests for facts with a restatement of the circumstances as recited in the American note of May 13, the promptness with which the reply will be dispatched is counted upon to serve as an indication that the American government wishes an early answer and does not desire to engage in a protracted diplomatic discussion.

Germany's failure even to discuss the reparation demanded by the American note and evasion of the request that guarantees be given that American vessels and lives be not endangered in the future are the main points, however, to which the United States government, it was generally believed, would advert in the second note. The expression of regret and offers of reparation for unintentional attacks on neutral ships are expected to have little weight in determining the nature of the response of the United States. When the note of May 13, was sent it was pointed out that such promises did not remove the risks to which American vessels and lives were subjected—and to support this contention, the United States will add, it is said, that the American steamer Nebraska was torpedoed without warning within the last few days.

ATTITUDE OF UNITED STATES. While it is generally thought the

DR. TUPPER PREACHED

At The Baptist Church Sunday Night and Chautauqua Musicians Sang.

SEN. LAFOLLETTE LAST NIGHT Closed a Successful Week For The Alkahest Chautauqua.

Washington, May 31.—Germany's reply to the American note sent after the sinking of the Lusitania was delivered to Ambassador Gerard at Berlin Saturday. It does not specifically answer the American representations concerning the sinking of the liner, nor the demand for the discontinuance of submarine warfare on merchant vessels. These points are left for further negotiations. The Berlin note expresses regret for attacks on American vessels, which are said to have been unintentional. Compensation is offered in cases where Germany is shown to have been at fault. The note charges, as a basis of negotiations, that the Lusitania was a British naval auxiliary, carrying mounted guns as well as troops and munitions. The United States is asked what steps have been taken, if any, to induce Great Britain to depart from its policy of cutting off Germany's importations of food supplies.

The church was filled to its capacity and a delightful musical program was rendered by the Metropolitan Quartette who sang two hymns, and by the local quartette, Messrs. White and Trice and Misses Espie and Miller.

Two of the Chautauqua musicians also sang solos.

The chautauqua was instrumental in bringing to Hopkinsville some high class music and some high class lecturers. It has been well said that the chautauqua with all that it stands for of culture and moral and mental uplift is a purely American institution.

When the early chautauqua movement was started by Bishop John H. Vincent and Lewis Miller over 40 years ago they could not have dreamed that the short season they planned for religious study and conference would have developed into the magnificent New York chautauqua, with its beautiful surroundings, its 60-day season, and hundreds of teachers and speakers, and the allied course of home study. But great as are these results, a development of more value in the circuit chautauqua, which may be called the people's university.

Through this plan comparatively small towns may have the benefit of a chautauqua season at a small cost. On its platform are heard the foremost thinkers of the country; men who stand for lofty ideas and signal achievements. Through them the principles of politics, civics, humanitarianism, science and art are brought to the people in a way that cannot but be inspiring, and leave some desire in the heart of the adult and still more in the heart of the youth to be something, to do something worth while in a world of action.

United States will answer Germany's requests for facts with a restatement of the circumstances as recited in the American note of May 13, the promptness with which the reply will be dispatched is counted upon to serve as an indication that the American government wishes an early answer and does not desire to engage in a protracted diplomatic discussion.

Persons close to President Wilson have learned that he is determined to obtain reparation for the Lusitania victims and assurances of respect for American rights in future, and that failing in this, he would not hesitate to sever diplomatic relations with Germany.

In German quarters here, it was again reiterated that the Lusitania was armed.

To controvert this, the United States has proof gathered before the American note was sent that there were no guns aboard. Furthermore, the British government entered into an informal agreement with the United States early in the war to see that no British vessels left American ports armed.

BIG BUNCH NOTABLES

Will Be Here Thursday With The Morgan Excursionists.

GREAT TIME IN PROSPECT.

Automobile Trip Over South Christian And Barbecue At Noon.

An imposing array of state and government officials will be members of the party of central and eastern Kentucky farmers and farm demonstrators who will visit Warren and Christian counties next Thursday. Geoffrey Morgan, now state agent for the farmers' co-operative demonstration work, is the man who first suggested the trip.

Among the notables will be Assistant Secretary of Agriculture Karl Krooman and Bradford Knapp, demonstrator of farm work also the following state officials: President Henry S. Barker, of state university; Dr. Fred Mutchler, director of farm extension work; Prof. George Roberts, state agronomist; Prof. C. W. Mathews head of horticultural department; Prof. E. C. Goode, head of the animal husbandry department; Dr. Robert Graham, state veterinarian; Dr. H. K. Wright, assistant state veterinarian; Hon. J. W. Newmann, commissioner of agriculture; Dr. F. W. Musselman, state veterinarian; Dr. J. G. Crabbe, president of Eastern normal school; Prof. J. H. Pollen, head of the agricultural department of eastern normal school; Geoffrey Morgan, state agent for the co-operative farm demonstration work.

The visiting farmers and agricultural agents from all over Kentucky will be here Thursday morning early and will be taken to Hotel Latham for breakfast. After breakfast the entire party and the guides from the Business Men's Organization, will traverse a large part of the county in 100 or more automobiles and return at noon to a great free barbecue at the grounds of the Pennyroyal Fair. There will be no admission charged and a great crowd is expected. There will be a speaking program at the fair grounds. In the afternoon there will be another inspection trip to the country, returning to W. R. Brumfield's to a strawberry supper. Then back to town and a park meeting after supper.

Geoffrey Morgan will bring with him 138 Bluegrass visitors and fully as many have accepted invitations from the local committee. At least 200 guides will go with the visitors to explain the points of interest.

The itinerary for the forenoon will be out Nashville pike to Bradshaw road, thence to the Holland place, thence across to Tobacco road, thence to J. J. Garrott's, thence through Garrott and Pendleton farms, crossing Bradshaw road, by F. B. Lacy's and Richard Leavell's to Bolivar on Clarksville pike, down pike to Clardy highway, south of Oak Grove, thence by highway to Bell's station, returning between the farms of Jno. W. Garnett and Howard Brame to Miller's road, thence by Clarksville pike to city and fair grounds. After dinner will go out Cox Mill road, and return by Canton pike, going through farms of E. D. Jones, A. M. Henry, R. H. McGaughey and others.

Chairman L. H. Davis, of the Transportation Committee, has 93 cars promised, but wants at least 25 more, as the number of visitors will be larger than previously reported. Those who have donated cars so far are:

S. T. Ashmore, J. M. Adams, C. Nas. D. Adams, Dr. T. P. Allen, W. B. Anderson, John H. Bell, Douglas Bell, Dr. Manning Brown, J. W. Brown, Dr. J. L. Barker, Dr. T. W. Blakey, Jack Bronaugh, Cranor & Clark, Dr. M. E. Croft, R. E. Cooper, Geo. I. Crabtree, M. C. Carneal, W. R. Crider, H. H. Chapman, C. C. Carter, A. S. Clardy, W. A. Chambers, H. W. Dorris, Guy Doherty, Lucian Dade, J. F. Ellis, A. H. Eck-

ORATORS TO-NIGHT

High School Orators Will Discuss The European War Merits.

WAS GERMANY JUSTIFIABLE

Nearly Thirty Graduates To Receive Diplomas Thursday Night.

The annual debate of the literary societies of the High School will be held at the Tabernacle to-night and six young men will contest for the class medal for oratory.

The question will be the attitude of Germany in the present war. Joel Roberts, Livingston Leavell and Tandy Wadlington will affirm that Germany is justifiable and H. K. Jarrett, Jas. Skerritt and Jas. Higgins will deny.

Thursday night the following senators will receive diplomas:

Lucy Allensworth, Lorene Allen, Lucille Cowherd, Fern Fortner, Doretta Grau, Viva Locker, Harriet Major, Verna Pool, Virginia Pursley, Karline Robinson, Mary Rice, Bertha Thomas, Jamie Walker, Lenora Wall, Ida Means, Edward S. Dabney, Wesley Dalton, James Higgins, H. K. Jarrett, Gilmer Pursley, Andrew Quarles, Joe Randle, Jas. Skerritt, Henry Stites, Thos. Underwood, Cooper Weaks, Harold Weaver, Tandy Wadlington.

Old Veteran Convicted.

Georgetown, May 28.—Laz Allen, who says he is more than eighty years old, was sentenced to years' imprisonment in the penitentiary Wednesday in Scott Circuit Court for the murder of Moody Smith, 18 years old. Allen is a Union veteran.

Conference Ends.

The Pan-American Financial Conference came to an end Saturday night after six days' discussion of the problems which have confronted the two Americas as a consequence of the European war.

Lost Infant Daughter.

An infant daughter of Mr. and Mrs. Charles Washington Jones, who resides on Mr. Bailey Atkins' farm on the Clarksville pike, died Sunday and the remains were interred in Riverside Cemetery yesterday.

les, Sam Frankel, L. E. Foster, M. C. Forbes, R. J. Garrott, Dr. J. G. Gaither, Jno. W. Garnett, J. Thos. Garnett, E. H. Higgins, W. C. Holman, Robt. Holman, W. H. Hammond, W. R. Hammond, C. F. Johnson, T. P. Johnson, T. C. Jones, Lucian Jones, H. A. Keach, Richard Leavell, L. L. Leavell, Chas. R. Lewis, Moses L. Levy, W. C. Lindsey, Mrs. T. W. Long, Clyde Lacey, Dr. A. W. Lovan, J. J. Metcalfe, W. S. Mitchell, Ben Moore, M. A. Mason, J. P. Myers, Geo. H. Merritt, H. I. Minty, W. H. Massie, R. H. McGaughey, T. J. McReynolds, A. D. Noe & Son, Ed Petrie, John Petrie, Dr. W. S. Petrie, E. G. Peter, P. B. Pendleton, Esq., W. L. Parker, S. A. Powell, J. H. Robinson, Jno. L. Rives, T. S. Rives, Wm. Smotherman, Jewell W. Smith, Dr. H. P. Sights, G. H. Stowe, Robert Stowe, Wm. Summers, Fred Schmitt, Prentiss Sallee, Dr. Sandbach, Dr. J. E. Stone, Dr. A. H. Tunks, W. T. Tandy, E. R. Tandy, Mrs. Lillian Van Hooser, Frank Vaughan, S. U. Wooldridge, Dr. J. A. B. Word, Wm. Wilson, and Dr. S. H. Williams.

The following owners of cars have not been seen by the committee, but are expected to respond: Dave McCord, W. E. Trahern, W. J. Wilson, Wm. Wilson, Bailey Waller, Virgil Acree, Sam Bumpus, Binnis Bros., Clint Cayce, J. E. Cooper, G. L. Dulin, Dr. E. L. Gates, Dr. S. H. Grace, Dr. W. A. Haynes, Marvin Lowry, P. N. Lee, Roy Kenner, W. W. Radford, T. L. Rives, C. E. Sibley, Bud Robinson, Dr. H. W. Watts, Geo. W. Clark and J. M. Maddox.

BIG BATTLE RAGING IN THE EAST

Teutonic Allies Are Making Supreme Efforts to Capture Przemysl.

PROGRESS HAS BEEN SLOW French Report Occupation of German Trenches Along Yser Canal.

London, May, 31.—Around the great fortress of Przemysl a mighty battle is still raging. The Austro-German armies are making a supreme effort to cut off the stronghold and free these armies for operations against Italy and the allies in the west.

Although great human sacrifices are being made, progress latterly has been extremely slow, as the Russians have had time to bring up large reinforcements.

North of Przemysl the Russians appear to be more than holding their own, but to the southeast the Austrians and Germans claim further headway and now command with their artillery the railway between Przemysl and Grodok. From Lemberg the Russians draw a large portion of their reinforcements and supplies.

The battle is still undecided and hopes run high in the allied camps that the Russians can hold their lines until the advance of the Italians and the strengthening of the Anglo-French armies compel the Germans to withdraw part of their armies from Galicia.

In the west there has been considerable fighting along the Yser canal, where the French report the occupation of German trenches, and in the vicinity of Neuville St. Vaast, where the French advanced about a quarter of a mile.

The German official statements say that after a ten-hour artillery attack east of the Yser canal the allies were repulsed.

The steamer Tullochmoor has been sunk by a German submarine, while considerable alarm was caused Sunday by a report that the White Star liner Megantic, bound from Liverpool for Montreal, with many passengers aboard, was being chased. The liner, however, escaped.

Height of Fanaticism.

Mr. McChesney, a candidate for the Democratic nomination for Governor, is charged in the Frankfort Courier with the statement, that "we would rather see a 'dry' Republican in the United States Senate than a 'wet' Democrat." Since prohibition is not a cardinal tenet of the political faith of the Kentucky Democracy, nor of our grand old President, it seems rather strange that a candidate who is seeking the suffrage of the people should be based upon a single issue, on which opinions of just as good men as he differ.

The thrust is plainly aimed at Senator James, who, though a local optionist, refuses to stand for the statewide propaganda. Mr. McChes

Sheriff W. B. Sullivan required his
four deputies to go to the country
and personally set out three acres of
tobacco for Roll Sanderson, who was
sick in bed.Edward Bunge, a mussel digger,
found a pearl in the Ohio river a few
miles below Evansville, that the
jewelers say is worth from \$500 to
\$1,000.The Danville Messenger issued a
big illustrated number last week
while the Knights Templar conclave
was in session. It was filled with
much matter that was of interest to
Masons and was a fine presentation
of the historical and commercial im-
portance of the city.Despondent from ill health and
continued reverses of fortune, Col.
John C. Davidson, for years one of
the foremost insurance men and
best-known citizens of Louisville,
committed suicide at Leavenworth,
Ind., by cutting his throat with a
razor.The Serbian government has de-
cided to engage forty American doc-
tors. There are working in Serbia
now sixteen American doctors under
Dr. Richard P. Strong, who also en-
gaged twenty-five of those who were
with the American Red Cross mis-
sion.Five Mexicans to have been
hanged at Florence, Ariz., Friday
for murder, were granted a nine-
weeks' reprieve at the last moment
by the board of pardons, in order
that they might have separate hang-
ings. Gov. Hunt and Secretary
Bryan asked for the reprieve, and
commutation is liable.The German submarine menace is
bringing officials to realize the great
danger facing England if Germany
increases largely the number of her
under-sea craft. This has been im-
pressed on the British mind by the
success of submarines operating in
the Dardanelles, their ever-increas-
ing activity around the British Isles
and the threat to carry this form of
warfare to the Suez canal and trade
which passes through that water-
way. Friday came reports of the
sinking of the British steamers
Cadeby and Spennymoor and the
Swedish bark M. Robsvall, and a
statement that a big liner Argyllshire
was chased and fired on by an un-
dersea boat but escaped to Havre.President Wilson has decided to
serve notice on the warring factions
in Mexico that conditions in that
country have become intolerable and
that unless they themselves, compose
the situation soon, some other means
may have to be employed to accom-
plish the result. The first intimation
of the President's determination to
take this step came in his ap-
peal issued as head of the American
Red Cross, setting forth that "dusto
several years of internal disturbances
the unfortunate people of many
parts of Mexico have been reduced
to the verge of starvation," and urg-
ing contributions to be relief funds.
This statement has been prepared
and will be issued after the cabinet
meeting and then be communicated
to the leaders of the Mex-
ican factions.

Diocletian.

Diocletian, who wore a crown so
fortunate and so revered, resigned it
to retire to the felicity of a private
life; and some time after, the neces-
sity of public affairs requiring that
he should reassume his charge, he
made answer to those who came to
court him to it: "You would not
offer me," said he, "to persuade me to
this had you seen the fine order of
the trees I have planted in my or-
chard and the fair melons I have sown
in my garden."LIVE

INCREASED SIZE OF LITTERS

Iowa Station Assists Sow Before
Breeding With Rapid Increase
in Feeding of Protein.A breeding practice used at the
Iowa Agricultural station should be
worth remembering by every hog
raiser in an alfalfa district, since
alfalfa contains a high percentage
of protein, almost too much for a single
feed. With a view of increasing the
number of offspring farrowed at the
Iowa station they assist the sow be-
fore breeding with a rapid increase in
the feeding of protein, which is called
"flushing." This seems to stimulate
the production of ova or life germs,
which may later be fertilized by the
sire, and consequently this tends to-
ward an increase in the size of the
litter.It has been found that where a
large amount of protein is fed just be-
fore the breeding season that the
sows will not only require less services,
but more pigs will be farrowed
than if scant rations are given. For
best results it is well to have the
sows on pasture. For best results also
flushing should commence about ten
days before breeding, or a little sooner.
It is also necessary to have a boar
of strong constitution in order that
sufficient ova be fertilized. Tankage,
meat meal, skim milk and such
foods are used in supplying protein.

BEST FEEDS FOR FATTENING

Better to Grind Grain and Feed in
Form of Thick Slop Than to
Feed It Alone.It generally is estimated that rye
has a feeding value about 10 per cent
lower than that of corn when fed to
fattening hogs.It is better to grind the grain and
feed it in the form of a thick slop
than to feed it whole. The dry meal
forms a sticky mass in the hog's
mouth that is not relished.Some feed such as tankage, skim
milk or shorts should be fed in con-
nection with the rye.Rye is lacking in protein and does
not give the best results when fed
alone. It also will be a good plan to
feed some corn in connection with the
rye if the corn can be obtained at a
reasonable price.

EASY TO LOAD BALKY HORSE

Tie Rope Around Animal's Rump and
Pull on That as Well as Halter
Will Prove Effectual.While loading horses in a car we
were troubled by one large animal
balking, and although we tried every
expedient we could think of, the beast
could not be induced to enter the car.Getting a Balky Horse Into a Freight
Car.writes Harlow D. Burnside of Ekalaka,
Mont., in Popular Mechanics. After
half an hour useless work one
of the cowboys suggested that we tie
a rope around the animal's rump and
pull on that as well as on the halter
rope. This we did, and it worked to
perfection, proving a great help in
future work of this kind.

GREAT VALUE OF PUMPKINS

Vegetable Has Cooling Influence on
Animal's System and Keeps Stom-
ach in Good Condition.Great value is obtained from pump-
kins fed to hogs along with corn from
the corrective influences which they
exercise upon the digestive system.They have a cooling influence on
the pig's system and keep his stomach
and bowels in perfect condition while
he is being fed a large amount of
corn during the finishing process and
consequently he is less subject to all-
ments at that critical time.But the seeds of pumpkins are so
exceedingly rich in protein that the
pigs should not have too many of them.Pumpkins are valuable for hogs af-
flicted with worms.

SHEEP NOTES.

A very little grain, fed regularly,
will go a long way in making the
flock profitable.A mixture of oats, wheat bran and
linseed meal, scattered in a broad-bot-
tomed trough, should be fed.The linseed meal will keep the
bowels in good condition.If a ewe is constipated, put her in the
hospital pen, and give her more
linseed meal.The flockmaster, or owner, must be
ever vigilant. He should know his
flock so well that the very slightest
indisposition will be detected at once.Feeding Floor for Pigs.
Provide a plank or cement feeding
door for the hogs. Keep it clean. It's
the hogs' table, not yours.

Stopped Those Pains.

What Gives Milk Its Color.

Recent experiments show that the
color of milk is chiefly due to the pres-
ence of carotin, a coloring matter
found abundantly in green plants, es-
pecially in grass. The yellow pig-
ments of our bodies also consist of
carotin, which is probably derived
chiefly from our food.Children Cry

PUBLIC
ROADS

ACTUAL COST OF GOOD ROAD

Various Methods of Financing Road
Building and Retiring Debts Dis-
cussed by Experts on Subject.While it is frequently easy for a
county to issue bonds and borrow
money for improving the local high-
ways, the raising of the money to re-
tire those bonds at maturity is often
not so simple. Many counties, in bor-
rowing money for bonds, figure that
the amount of money raised repre-
sents the total cost of the road, for-
getting that the road must be main-
tained and repaired if, at the end of
the term of the bonds, the county is to
have anything to show for its invest-
ment.The question of financing county
road building is discussed fully in De-
partment of Agriculture Bulletin No.
136, entitled "Highway Bonds," which
is written by the office of public roads
in collaboration with James W. Glover,
professor of mathematics and insur-
ance, University of Michigan. In this
bulletin the authors discuss fully the
various methods of financing road
building and retiring debts for road
construction, and also deal frankly
with the actual total cost of a road
during the life of the bonds. On the
total cost of a road, the authors cite
the following two examples as afford-
ing at least a basis for estimating the
total minimum cost of a mile of road:Bituminous macadam: Cost of con-
struction (\$10,500) under 5 per cent
serial bond with interest for 20 years,
\$16,012.50. Cost of annual repair and
maintenance (\$600) for 20 years, \$12,-
000. Total cost for 20 years, \$28,012.50.
Brick: Cost of construction (\$18,500)
under 5 per cent serial bond with in-
terest for 20 years, \$26,426.73. Cost of
annual repair and maintenance (\$300)
for 20 years, \$6,000. Total cost for 20
years, \$32,426.73.The authors point out that the ac-
tual cost of building and maintaining
a specific highway can be determined
only after the character and volume
of traffic and actual wear and tear
have been studied for a series of

Good Road in North Carolina.

years. The figures quoted above, of
course, will not apply to ordinary mac-
adam, gravel or clay roads, but in
all these cases the interest on the
bonds must be met, and there must
be expenditures to maintain them in
condition. The poorer the drainage
and the less permanent the character
of the road foundation, the greater
must be the percentage that repair
costs will bear to the first cost. Sim-
ilarly, the question of whether the
actual surfacing is designed to with-
stand the character of traffic and
weather to which it is subjected also
has an important bearing on what it
will cost the county to keep the road
in such shape that when the bonds are
paid the locality still will have a val-
uable property to show as a result of
its borrowing and repayment.

Most Helpful Signs.

One of the most helpful signs of
the present time is the attitude of the
farmer and the business man towards
greater permanency in building and
improvements. This is seen in road
building, in the very widespread use
of concrete on the farm and in the
tendency towards fireproof buildings
in all of the small cities. Truly there
are some places where concrete can
be used to good advantage on your
farm.

Good Road Benefits.

Good roads broaden our sympathy,
lessen distance and increase our use-
fulness.

Brings Market Nearer.

The good road brings the market
nearer to you.

Profits in Stock Feeding.

Much of the profits of stock feeding
will depend upon the kinds of feed
you have at hand and the quality of
the animals kept through the winter.

Straw for Bedding.

Straw for bedding animals should
be safely housed in the barn and not
allowed to go to waste in the stack.

Benefit of an Incubator.

In handling an incubator the per-
versity of a hen's nature does not
have to be reckoned with.

Children Cry for Fletcher's

CASTORIA

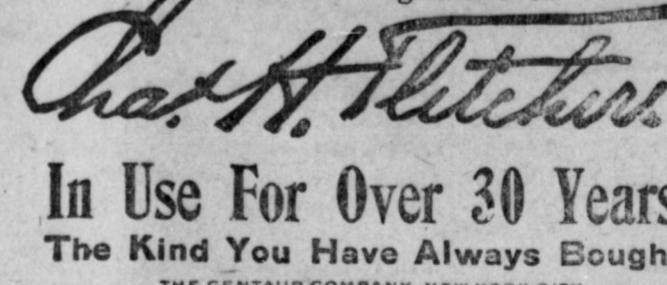

The Kind You Have Always Bought, and which has been
in use for over 30 years, has borne the signature of
Char. H. Fletcher, and has been made under his per-
sonal supervision since its infancy.
All Counterfeits, Imitations and "Just-as-good" are but
Experiments that trifles with and endanger the health of
Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Pare-
goric, Drops and Soothing Syrups. It is pleasant. It
contains neither Opium, Morphine nor other Narcotic
substance. Its age is its guarantee. It destroys Worms
and allays Feverishness. For more than thirty years it
has been in constant use for the relief of Constipation,
Flatulence, Wind Colic, all Teething Troubles and
Diarrhea. It regulates the Stomach and Bowels,
assimilates the Food, giving healthy and natural sleep.
The Children's Panacea—The Mother's Friend.

Era of the First Trousers.

The first trousers worn in London were of plain, light colored cloth, and fitted very tightly; almost as tight, we may believe, as those in this country a generation ago. In the second season striped and other figured cloths were used by some, but such trousers were regarded as quite plebeian, and fit for wearing only in bad weather, when the streets were muddy, or as a sort of rough outing garb at the seaside. A favorite material for trousers worn by men of fashion was an elastic stockinet, which fitted literally "skin tight." Beneath such garments, to supply the deficiencies of nature, men were not averse to wearing false calves and other paddings on their legs. Straps passing beneath the foot were used to keep the trouser legs held down in place.

One way to relieve habitual constipation is to take regularly a mild laxative. Doan's Regulents are recommended for this purpose. 25c a box at all drug stores.

CHOOSING A GOOD STALLION

Progressive Farmer Confronted With Difficult Problem—Feet and Legs Are Essentials.

(By J. S. MONTGOMERY, Minnesota Experiment Station.)

In the spring season the progressive farmer who keeps brood mares is confronted with the problem of choosing a stallion to which to breed. In many cases it is merely a question of eliminating the worst, as there are many communities that are not supplied with a good stallion. In many other cases, however, the saving of five dollars on a service fee plays an all too important part. A saving of five dollars on a service fee often

Fine Specimen of Imported Percheron.

means a loss of \$100 or more when the colt is two years old.

When looking at a stallion it is well to ask yourself, "How much would he be worth as a gelding? If his colts are like him, will they be good market geldings? How much improvement will he make when bred to the average farm mares?" The answer to these questions will decide whether the horse is a suitable sire or not. In answering them it should be kept in mind that good feet and legs are the first essential of a marketable horse. If the stallion does not have them he cannot be expected to produce them in his offspring.

PROHIBITIONISTS OF KENTUCKY NAME TICKET

Rev. Andrew Johnson of Wilmore Is Nominated for Governor at Louisville.

Louisville, Ky., May 28.—Kentucky prohibitionists in convention here today nominated a state ticket, as follows:

Governor, Rev. Andrew Johnson, Wilmore, Ky.; lieutenant-governor, T. B. Demaree, Wilmore; secretary of state, Mrs. Frances Beauchamp, Lexington; treasurer, Adam Carpenter, Moreland; auditor, M. L. Moore, Franklin.

The gubernatorial nominee is pledged to withdraw in the event, either of the dominant parties nominates a candidate who is pledged to prohibition.

A Doctor's Prescription for Cough An Effective Cough Treatment.

One-fourth to one teaspoonful of Dr. King's New Discovery; taken as needed, will soothe and check Coughs, Colds and the more dangerous Bronchial and Lung Ailments. You can't afford to take the risk of serious illness, when so cheap and simple remedy as Dr. King's New Discovery is obtainable. Go to your Druggist to-day, get a bottle of Dr. King's New Discovery, start the treatment at once. You will be gratified for the relief and cure obtained—Advertisement.

A Frankfort Rumor.

That our readers may be informed as to all matters of interest in the present campaign, we wish to state that there was a rumor in circulation here and in Louisville Friday

OUTBREAK OF FOOT AND MOUTH DISEASE

Inspectors Sent Out by Kentucky Board to Trace the Source of It.

Louisville, Ky., May 28.—Nine inspectors were sent out today by the Kentucky live stock sanitary board to trace the source of the outbreak of the foot and mouth disease discovered in a shipment of Kentucky live stock to Pennsylvania.

The inspectors will visit counties in southern Kentucky and northern counties of Middle Tennessee. Sheep owners interviewed today said the quarantine against Kentucky by Pennsylvania would prevent their selling wool in the east, and that their loss by reason of this would amount to \$1,000,000.

NOTICE

Your Sanitary assessment for June, July and August, is due June 1st, payable at my office. Please pay same promptly and save penalty.

W. R. CRAWLEY,
Sanitary Officer.

Gen. Young Not Present.

On account of his illness in a Cleveland hospital, Gen. Bennett H. Young, commander-in-chief of the United Confederate Veterans, designated Gen. George P. Harris, of Opelika, Ala., to act in his stead at the Richmond reunion, which begins to-day.

MEADOW LARK EATS MANY FARM PESTS

Meadow Lark (Sturnella Magna.)

(Prepared by the United States Department of Agriculture.)

May is the month when the meadow lark does some of its best work in aiding the farmer, for that is when the cutworms begin their career, and this little bird devours them by thousands. It also eats many caterpillars, and in the same month these creatures form over 24 per cent of its whole diet. Caterpillars which are ground feeders are often overlooked by birds which habitually frequent trees, but they do not escape the meadow lark. Ants, wasps, spiders, and chinch bugs are other harmful pests eaten by this feathered friend of humanity.

In 1,514 stomachs of the meadow lark examined, animal food (practically all insects) constituted 74 per cent of the contents and vegetable matter 26 per cent. As would naturally be supposed, the insects were ground species, as beetles, bugs, grasshoppers and caterpillars, with a few flies and wasps and spiders. A number of the stomachs were collected when the ground was covered with snow, but even these contained a large percentage of insects, showing the bird's skill in finding proper food under adverse circumstances.

Of the various insects eaten, crickets and grasshoppers are the most important, constituting 26 per cent of the food of the year and 72 per cent of the food in August. It is scarcely necessary to mention the beneficial effect of a number of these birds on a field of grass in the height of the grasshopper season. Of the 1,514 stomachs collected at all seasons of the year, 778, or more than half, contained remains of grasshoppers, and one was filled with fragments of 37 of these insects. This seems to show conclusively that grasshoppers are preferred, and are eaten whenever they can be found. Especially notable is the great number taken in August, the month when grasshoppers reach their maximum abundance.

Next to grasshoppers, beetles make up the most important item of the meadow lark's food, amounting to 25 per cent, about one-half of which are predaceous ground beetles. The others are of harmful species.

Forty-two individuals of different kinds of May beetles were found in the stomachs of meadow larks, and there were probably many more which were past recognition. To this form and several closely allied ones belong the numerous white grubs, which are among the worst enemies to many cultivated crops, notably grasses and grains, and to a less extent strawberries and garden vegetables. In the larval stage they eat the roots of these plants, and being large, one individual may destroy several plants. In the adult stage they feed upon the foliage of trees and other plants, and in this way add to the damage which they began in the earlier form. As these enemies of husbandry are not easily destroyed by man, it is obviously wise to encourage their natural foes.

Among the weevils found in the stomachs the most important economically are the cotton-boll weevil and the recently introduced alfalfa weevil of Utah. Several hundred meadow larks were taken in the cotton-growing region, and the boll weevil was found in 25 stomachs of the eastern meadow lark and in 15 of the western species. Of the former, one stomach contained 27 individuals. Of 25 stomachs of western meadow larks taken in alfalfa fields of Utah, 15 contained the alfalfa weevil.

The vegetable food consists of grain and weed and other hard seeds. Grain in general amounts to 11 per cent and weed and other seeds to seven per cent. Grain, principally corn, is eaten mostly in winter and early spring and consists, therefore, of waste kernels; only a trifle is consumed in summer and autumn when it is most plentiful. No trace of sprouting grain was discovered. Clover seed was found in only six stomachs, and but little in each. Seeds of weeds, principally rag-

FOR SUCCESS WITH TURKEYS

Young Poults Should Be Penned Up for First Week or Two—Give Old Ones Free Range.

There is no doubt but grown turkeys must have free range to make any success with them, but I believe that the young poults should be penned up for the first week or so, as the mother turkey hen always starts out too early in the morning, when the dew gives the young ones a chill and as a consequence many of the poults are lost.

So many advocate, "there's nothing like giving the turkeys free range with their poults." This may be entirely all right in a dry season, but the morning dew and sudden rain showers are apt to catch you any time and a number in my vicinity lost over half of their free-range poults last year on account of the sudden rains and heavy dew during the hatching season.

FISH GATHER IN MILLIONS WOMEN HONORED FOR VALOR

Remarkable Schools of Herrings That Annually Assemble on the North Pacific Coast.

France Has Always Been in the Lead in Recognizing the Services of the Fair Sex.

Every summer there is a remarkable run of herring on the north Pacific coast. These fish come in such shoals that they seem a solid moving mass. They crowd into the inlets and sheltered bays and can be taken in millions by the simplest means.

Men and boys on the Grand Trunk Pacific dock at Prince Rupert use waste paper baskets, and similar utensils, which, with rope attached are thrown into the water and allowed to sink below the surface, then hauled in again full of overflowing with lovely herring.

The eastern meadow lark is a common and well-known bird, occurring from the Atlantic coast to the great plains, where it gives way to the closely-related western species, which extends thence westward to the Pacific. It winters from our southern border as far north as the District of Columbia, southern Illinois, and occasionally Iowa. The western form winters somewhat farther north. Although it is a bird of the plains, and finds its most congenial haunts in the prairies of the West, it is at home wherever there is level or undulating land covered with grass or weeds, with plenty of water at hand.

But a better idea of the density of these schools of fish is afforded by the fact that fishing lines with hook attached can be sunk in the water, and pulled out instantly with as many fish as there are hooks, be there a dozen or fifty.

Tons of these herring are taken by the fish companies and frozen in boxes for use as bait for the halibut fisheries. They are an excellent table fish, and there ought to be a profitable market for them in the interior. As yet comparatively few of them are shipped, though dealers are now calling for them.

Fishermen say the herrings seek the bays to escape the whales, which prey on them in certain localities during their migrations.

Working a Ship to Death.

A curious instance of a craft being worked to death is reported from Baltimore, where the schooner Johnnie Green was seized for claims by the crew. There was due the six men the sum of \$193.30, which under normal conditions might be raised by a mortgage on the boat. "But she's got enough mortgages on her now to sink her," said Captain White, "and I could not borrow another cent. There's \$700 or \$800 lent on her already."

When told that the Johnnie Green was forty-two years old, and had been in the bay service all of that time, Marshal Stockham was ready to believe that no more money could be borrowed on her. He ordered her taken in charge and a watchman put aboard.—Nautical Gazette.

Definitions.
Husband: a maker of excuses.
Wife: a skeptic.—Smart Set.

Seldom in the world's history have women been decorated for valor on the battlefield, for the simple reason that opportunities for deeds which would earn them such decorations are very few. Nevertheless, instances can be found, and nowhere more than in France, where the heroic woman has little to complain of as regards public recognition of her services.

Since Napoleon founded the Cross of the Legion of Honor on May 19, 1802, probably a score or more women have been decorated for personal bravery in warfare, but unfortunately only one or two of their names have been preserved, as the palace of the Legion d'Honneur was burned during the commune and all records were destroyed.

Napoleon decorated at least seven women for valor. The chief of these was Anne Biget (Soeur Marthe), who was a sister of mercy, and earned the Cross of Legion of Honor for her devotion to the sick and wounded, in the care of whom she risked her life constantly. The other women on whom Napoleon bestowed the cross were disciples of Joan of Arc, who shared the perils and hardships of their men folk, enlisting and fighting gallantly.

Another woman earned the decoration for valor when France was fighting Germany in 1870. Mlle. Dodu, a postmistress at Pithiviers, a village which had fallen into the hands of the invaders, destroyed a message which she had been ordered to transmit. For this she was court-martialed by the Germans and condemned to death. On the arrival of Prince Frederick, however, she was released, the prince himself complimenting her on her courage.

Killed By Waterspout.

Holleville, Ky., May 28.—A waterspout at Badger, this county, at 4 o'clock Wednesday afternoon killed James Hash, 12 years old, when the home of his father, Arthur Hash, was washed away.

Mr. Cox Out Again.

Mr. Albert C. Cox, who had been confined to his room for about two weeks, is able to be up, though he has not fully recovered from his illness.

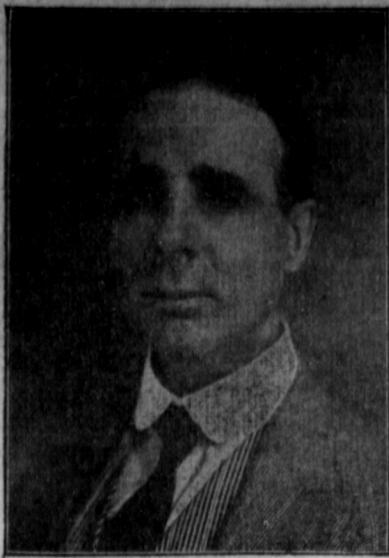

In city and county, for business or pleasure under all conditions, the mechanical perfection, strength, light weight and simplicity of the Ford car make it the people's utility. And they average only about two cents a mile to operate and maintain.

Barring the unforeseen, each retail buyer of a new Ford car between August 1914 and August 1915, will receive from \$40 to \$60 as a share of the Ford Motor Company's profits.

Runabout, \$440; Touring Car, \$490; Town Car, \$690; Coupelet, \$750; Sedan, \$975, f. o. b. Detroit with all equipment.

TO SERVE WITH LUNCH

SUGGESTIONS FOR DISHES EASY
TO COMPOUND.

Will Frequently Be Found Valuable
in Emergencies That All House-
wives Experience—Piquant
Suggestions From France.

Hors d'oeuvres are an essential part of the French *déjeuner*, but here they are not often served at the family luncheon. They are often convenient, however, to eke out and give a little appetizer to a luncheon that might otherwise be scanty, and a few good ideas for hors d'oeuvres and savories are valuable for the housewife. Here are a few sample recipes that can be made and worked into a luncheon at the last moment:

Deviled Sardines.—Take sardines, warm them in their own oil, add a little lemon juice, season highly with salt, pepper and English sauce, serve very hot on small rounds of toast.

Savory Toast.—Chop very finely, or run through a meat chopper, any pieces of cold chicken, beef, ham or tongue. Pound to a paste with the yolks of two hard boiled eggs, a piece of butter, pepper, salt, a little Chutney and Worcestershire. Spread rather thickly on thin strips of toast and set in the oven to heat.

Cheese Canapes.—Cut bread into pieces one-half an inch thick, then stamp them into circles with a biscuit cutter. Sauté the bread in a little butter until it is of an amber color on both sides. Cover the slices with a thick layer of grated cheese, sprinkle with salt, pepper and a dash of cayenne. Fifteen minutes before the time to serve place them in the oven for a few minutes to soften the cheese.

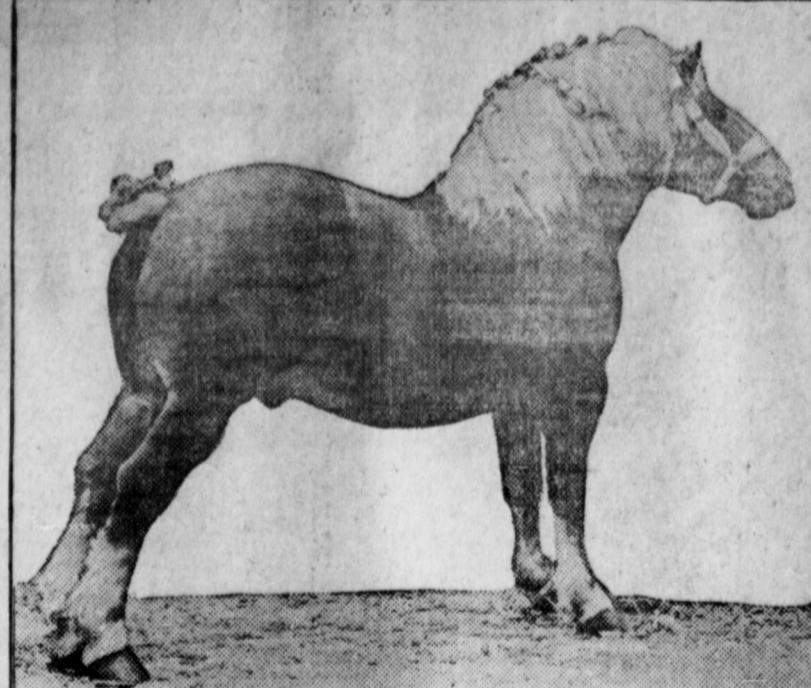

Anchovy Canapes.—Spread strips of fried bread with a thin layer of anchovy paste. Sprinkle over the top alternate rows of the white and yolks of hard boiled eggs chopped very fine. Sardine canapes are made by pounding the sardines to a paste, spreading it on strips of fried bread and sprinkling the top with some sort of chopped pickle.

Stuffed Eggs.—Cut hard boiled eggs in halves. Take out the yolks carefully and mix them with an equal quantity of softened bread crumbs; season highly with a little butter, salt and pepper. Moisten with any sauce; add a little raw egg. Fill the whites from which the yolks were taken, round off the tops smoothly, slice a small piece off the bottom, so that the eggs will stand upright, and serve. Any flavoring or seasoning that is liked may be added to the mixture for stuffing eggs—mayonnaise, mustard, mushroom, tomato, or they may be mixed with French dressing.

Joint Meeting of Doctors.

There will be a joint meeting of the Todd County and Christian County Medical Societies, held in Trenton Wednesday, June 2. Dr. Haggard of Nashville, Tenn., will be among the speakers who will address the meeting.

HORSES AND MULES IN THE COTTON BELT

Champion Belgian Stallion.

(Prepared by the U. S. Department of Agriculture.)

The destruction of horses in the countries now at war is enormous, and when peace is declared and for many years thereafter there will no doubt be a great demand for horses for agricultural and other work. The farmer who has surplus horses at that time will be in a position to obtain good prices.

The United States department of agriculture has recently distributed throughout the cotton belt information regarding horse and mule raising in the South, which should be of use to cotton growers whose crop has been affected by the present crisis, and who now wish to diversify their farming because of this. These farmers are advised particularly to keep their best mares to work on the farm and raise colts at the same time. They will then be able to raise horses for their own work as well as to take advantage of the home and foreign markets.

Many brood mares are overworked, while many others are kept too closely confined. The mare may be safely worked to within two weeks of foaling if good care is used to see that she is not overworked or injured in some other way. It is not unusual for mares which have been worked to the date of foaling to foal successfully. It

minous hays, if of a good quality, such as alfalfa, clover, and cowpea hay, are good for the foal. As the foal becomes older a more liberal grain ration should be provided. A yearling foal, to grow properly, will need four or five pounds of grain per day in addition to what hay will be eaten.

There is no single factor in agricultural production on the average farm that is of greater importance than good horse or mule power. This power can usually be furnished more cheaply by the production of needed animals in that particular locality than by purchasing them from remote localities. In home production there is also the added advantage of possessing animals which are thoroughly acclimated. Therefore if you are the owner of a good mare do not fail to breed her either to a good stallion or a good jack.

If the mare is of the light type, breed her to a good stallion of one of the light breeds; and if of a draft type, breed her to a draft stallion. The progeny of a light mare bred to a draft stallion or of a draft mare to a light stallion is usually a nondescript that is not fitted to any particular field and will not command the price of either a high-class light or a high-class draft horse. By the light type is meant horses of the Standardbred, Thoroughbred, American Saddle, and similar breeds; by the draft type is meant horses of the Percheron, Belgian, Shire, Clydesdale and similar breeds. In breeding to a jack, mares of almost any kind may be used if sound, the best mules, as a rule, being produced from the mares with the most weight and finish. The production of inferior animals of any kind is seldom profitable.

The department of agriculture, Washington, D. C., will send free of charge, to anyone who applies, the following bulletins:

No. 170. Principles of Horse Feeding.
No. 619. Breeds of Draft Horses.

WATER GLASS AND ITS USE

Solution of Sodium Silicate Is Excellent for Preservation of Eggs—Liquid Form Best.

(By CHARLES E. FRANCIS, Oklahoma Experiment Station.)

The chemical name for water glass is sodium silicate or silicate of soda. It may be obtained in a granular or powdered form and as it is somewhat difficult to get into solution I would advise the liquid form which may be obtained for about fifty cents a gallon.

This is a strong solution, 40-42 degrees, about the consistency of molasses.

The following formula may be used for preserving eggs: To ten quarts of water which has been boiled and cooled add one pint of water glass and stir thoroughly.

Place the solution in a jar or tub and add the fresh eggs in sufficient quantity to have at least two inches of the solution above the eggs. This quantity should be sufficient for about five dozen eggs.

Water glass may be bought from any of the large drug firms.

REDUCE THE COTTON ACREAGE

Everybody Should Raise All the Hay, Corn, Forage Crops and Garden Truck Needed by Family.

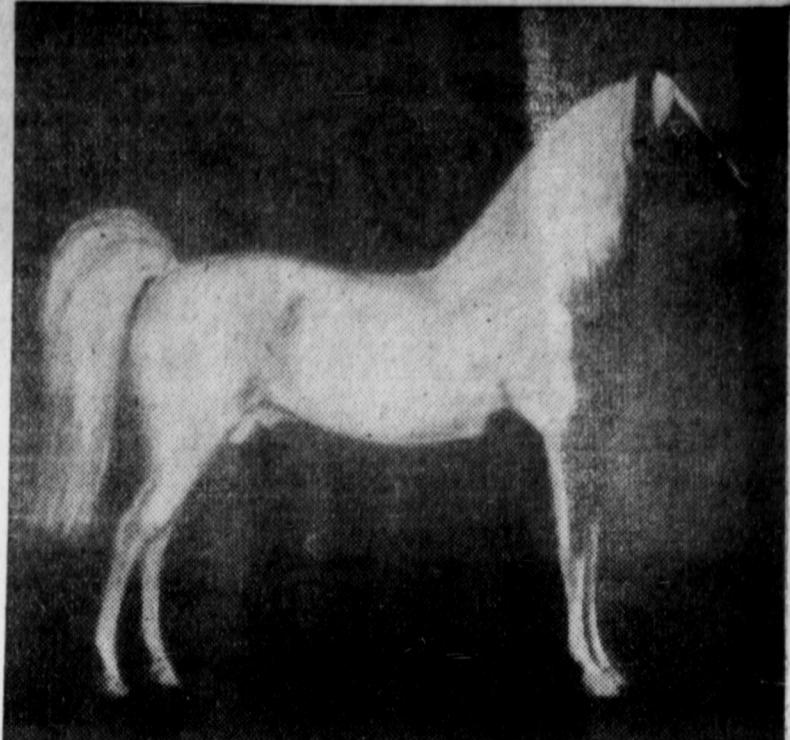

There is one easy, simple and effective way to reduce the cotton acreage—everybody plant enough land to raise all their hay, corn, forage crops and garden truck. Keep enough chickens and hogs to supply the table with eggs and meat, also raise and fatten one or more beef animals. With few or many acres devoted to these crops there will be less acres to plant in cotton and less need of it, for the family living is largely provided for.

The feed of the foal may be similar to that which the mare was receiving before the foal was weaned. The weaned foal should have two to three pounds of grain per day and what hay it will eat. A grain mixture consisting of two parts of ground oats, two parts of corn meal and one part of wheat bran, by weight, may be fed. If oats and bran are not available a mixture consisting of seven parts corn meal and one part cottonseed meal may be substituted. All of the legu-

Princess

The Mutual Masterpiece Enoch Arden, a beautiful film of the celebrated poem by Tennyson, will be seen at the Princess today, with three popular stars, Lillian Gish, Alfred Paget and Wallace Reid.

"Long lines of cliff breaking have left a chasm;
And in the chasm are foam and yellow sand;**
Here on this beach a hundred years ago,
Three children of three houses,
Annie Lee,
The prettiest little damsel in the port,
And Philip Ray, the miller's only son,
And Enoch Arden, a rough sailor lad;**
Played among the waste and lumber of the shore."

PRINCE ALBERT

Saddle, Harness, Trick
and Highschool Pony,
making the present seas-
on at The Veterinary
Hospital.

WALLACE REID in ENOCH ARDEN,
Four-part Mutual Masterpiece.
Produced by Majestic.

Thus began the friendship of these playmates, which grew stronger with the coming years. When Enoch and Annie were married, Philip remained the loyal friend of both, even after the news came that Enoch was lost at sea. For ten years Annie mourned her husband, then listened to Philip's pleading and wed him for her children's sake. When Enoch finally returned—for he had been shipwrecked upon a lonely island—he too was loyal to his wife and friend and Annie never knew. And a year later alone—but not forgotten—he passed to his reward.

Handicap Winner.

Harry Payne Whitney's 7-year-old gelding, Borrow, leased to L. S. Thompson, carrying 126 pounds, won the Kentucky Handicap at a mile and a quarter at Douglas Park over a heavy, holding track. Hodge was second and Prince Hermis third. Net value of the stake to the winner was \$11,700. The time was 2:10.2.5.

How's This?

WONDERFUL CITY OF LONDON

Properly Speaking, There Are Five or More "Cities" Contained in the Great Metropolis.

London the goal of conquest of which the captain of every Zeppelin, every U boat and every other Teuton, has set his heart and eyes, is truly the hub of an empire whose center for its very bigness never ceases to attract the attention of the lover of numbers. But which of the five or more Londons do you mean? That inner London, which has one of the oldest courts of law in the world, is the city of London, whose population is diminishing. It has now less than 20,000 people. Outside of it is ecclesiastical London, diocesan London, so to speak, over which the bishop rules. Then comes the county of London, which has 4,521,685 people in it, against the total of 3,811,827 persons in the bishopric. In the next outer limit, the criminal court district, there are 6,610,031 souls. That makes four concentric Londons whose radius is tethered at Charing Cross. But out and beyond that lie those rapidly growing suburban units whose location the inner London has not only overtaken but is helping to fill up with astonishing rapidity. Greater London has an area of 699 square miles and a radius of 15 miles. This outer rim has 2,730,002 persons, making with those within, a grand total of 7,254,683. — Wall Street Journal.

Handicap Winner.

Young animals make more pounds of gain from their food than when older. Dean Henry of Wisconsin gathered a lot of data on this and found that 38-pound pigs required 239 pounds of feed to make 100 pounds of gain, 78-pound pigs required 400 pounds of feed, 128-pound pigs 437 pounds of feed, 174-pound pigs 482 pounds, 226-pound pigs 498 pounds, 271-pound pigs 511 pounds and for the 239-pound hogs it took 535 pounds of feed to make the 100 pounds of gain, or nearly twice as much as for the 38-pound pigs.

This emphasizes the importance of pushing the hogs from the start in order to make the most economical gains.

It has been found at the North Dakota experiment station that April pigs can be made to weigh 200 to 250 pounds by November 1.

HOW THE SWINE MAKE GAINS

Importance of Pushing Hogs From Start Is Emphasized by Data Gathered at Wisconsin.

Young animals make more pounds of gain from their food than when older. Dean Henry of Wisconsin gathered a lot of data on this and found that 38-pound pigs required 239 pounds of feed to make 100 pounds of gain, 78-pound pigs required 400 pounds of feed, 128-pound pigs 437 pounds of feed, 174-pound pigs 482 pounds, 226-pound pigs 498 pounds, 271-pound pigs 511 pounds and for the 239-pound hogs it took 535 pounds of feed to make the 100 pounds of gain, or nearly twice as much as for the 38-pound pigs.

It has been found at the North Dakota experiment station that April pigs can be made to weigh 200 to 250 pounds by November 1.

RAISING MOTHERLESS LAMBS

Common Practice to Use Cow's Milk, Feeding From Bottle With Suitable Rubber Nipple.

Motherless lambs can be and commonly are, raised on cow's milk, fed from a bottle with rubber nipple—not from a pail, as are calves. Feed them about half a pint of milk or perhaps a little less, three times a day at first, increasing gradually. Warm the milk to a blood heat before feeding.

After a little time they can get some good from grass and skim milk can be substituted for whole milk.

Babies are sometimes raised on condensed milk and probably it could be used instead of fresh milk for lambs, but from the standpoint of both expense and results fresh milk is likely to give better satisfaction.

Keep Sheep Pen Level. Keep the pen level. Sheep get cast easily, and a hollow in the pen may be fatal to your best ewe.

Condition of Brood Sows. Keep the brood sows in a flesh-gaining condition from the time they are mated until they farrow.

Hindu Wisdom. If your mirror be broken, says a Hindu proverb, look into still water; but have a care that you do not fall in.

FARM ANIMALS

SHEEP KILL HARMFUL WEEDS

Generally Agreed Animals Eat All But
Few of the Exceptionally Un-
palatable Varieties.

(By E. L. SHAW.)

It has been estimated that sheep will eat 90 per cent of all troublesome weeds. They are, in fact, commonly used in cleaning up weeds from fields, fence rows, road sides, stubble fields, and corn fields. The common belief among farmers is that weeds eaten by sheep are so broken up in the digestive processes that the seeds will not germinate after passing through the body as in the case of other live stock. However, weeds are rarely permitted to go to seed if enough sheep are turned in the field while the weeds are young and tender.

In some investigations carried on by the Canadian government among a considerable number of sheepmen to determine the kinds of weeds eaten by sheep, it was generally agreed that sheep would consume all but a few exceptionally unpalatable ones, such as mullein, Scotch thistle, etc.

Where sheep have been kept, but where for some reason they have been disposed of, a striking difference has usually occurred in the appearance of the farm. Weeds have sprung up and grown where they had formerly been kept in check. There is no better solution to the weed problem than a flock of sheep.

In economy of production sheep are not surpassed by any other domestic animal. Besides converting waste products into nutritious food they will also manufacture a finished product out of the roughage and grain of the farm at least as cheaply as other classes of live stock.

GOOD POINTS OF SHROPSHIRE

Ewes Are Excellent Mothers, Are Gentle and Easily Handled—Lamb Is Favorite in Market.

Mr. Herbert E. Powell, Ionia, Mich., in a letter to Farm Home gives the following reasons for his preference for the Shropshire breed of sheep.

1. The Shropshire ewes are good mothers under adverse conditions and make friends of their keepers.

2. The Shropshire are the leading attractions at the fairs in the sheep department both as to numbers and nice fitting. The Shropshire when properly cared for makes a fine picture and is a work of art either in pasture or the show ring.

3. The Shropshire is gentle, easily handled and a pet with the man fit to care for sheep, and a great contrast to the wild Merino.

4. The Shropshire lamb is the leading favorite in the market, and sells to the best advantage as soon as it is large enough to dress well. The bigger the lambs the better they sell, provided they were well fattened. The

TREES ALONG THE ROADSIDES

Many Organizations Have Promised

Their Aid to Provide Free Fruit

for the Weary Traveler.

Fresh fruit plucked from roadside trees is a pleasure travelers will be able to enjoy several years hence, when they stop for lunch in some shady nook.

In many communities civic associations, farmers' organizations and horticultural societies have promised their aid to provide free roadside fruit for the traveler.

This very pleasant idea was originated by a southern Missouri nursery, which has placed 50,000 apple, peach, pear, plum and cherry trees along the side of the Missouri section of the National Old Trails highway. The fruit will be free to transcontinental motorists.

Help by Using Drag.

Individual farmers can materially help the good roads cause by rigging up a road drag and using it on roads adjacent to the farm when the ground is sufficiently moist.

Regularity in Feeding.

It is equally as bad to overfeed as it is to underfeed poultry. There should be regular hours for feeding, and never a feast today and a famine tomorrow be allowed. Avoid too much carbonaceous food. Carbon is oil, fat, starch, sugar, etc.—carbonaceous material.

Harm by Bad Roads.

Muddy roads always add to the distance to market and cut the profits on produce.

ROAD BUILDING

MACHINE FOR ROAD BUILDING

Useful for Applying Hot Bituminous Binder Under Pressure, Filling Spaces Between Stones.

A recent addition to road building equipment is a gasoline driven machine used for applying the hot bituminous binder under pressure so that it will penetrate and fill the spaces between the stones. After the first course of stone is laid this machine is run over the roads, discharging the bituminous binder through a series of vertical pipes at the forward end. As soon as the binder has hardened, a second course of stone is laid and rolled, the rolling forcing the two courses into one compact layer. The binder is then applied a second time, and the process

Road Building Machine.

ess is repeated until the road is completed. This process makes it possible to build a compact road with no openings into which water can penetrate. The bituminous binder is carried in the large tank, which has a capacity of 750 gallons. It is heated by steam coils in the tank, the steam being supplied by a flash boiler which is fired by fuel oil. Steam supplied by this boiler is also used for running an air compressor by which the binder is forced into the spaces between the stones.

ROUGH ROADS HURT SCHOOLS

Communities Having Advantage of Improved Highways Can Afford to Build Better Buildings.

That good roads materially affect the county school system has been repeatedly demonstrated. In states where the roads are kept up well the attendance at school is 80 per cent as against 64 per cent in states where the roads are neglected and are in bad condition. Improved roads make it possible to consolidate or centralize the schools and to establish graded schools in the rural districts. Such schools centrally located will accommodate all of the children within a radius of from four to five miles. In many communities having the advantage of good roads, commodious buildings have been provided, more competent teachers have been employed and modern facilities for teaching have been supplied at a minimum cost.

There are about two thousand consolidated rural schools in the United States, and it is significant to note that the states that have made the greatest progress in the building and maintenance of good roads have the largest schools. No community can afford not to have good roads and where a few enterprising citizens will take the lead the results can be realized.

Our Great Family Bargain

WAR!

What Is It All About?

HAS the whole world gone stark mad over a very foolish and trivial question? Are swords rattling, cannon rumbling, mailed armour glistening just because Russia wanted to show her love for the little brother—Serbia?

Tear aside the curtain of Europe's politics and the grim and sinister game of chess that is being played. See upon what a slim, yet desperate, excuse the sacred lives of millions may be sacrificed. Read the history of the past one hundred years, as written by one of the greatest authorities the world has ever known, and learn the naked, shameful truth. THE THRICE-A-WEEK EDITION
OF THE NEW YORK WORLD

practically a Daily at the Price
of a Weekly. No other News-
paper in the world gives so
much at so low a price.

The year 1914 has been the most
extraordinary in the history of modern
times. It has witnessed the out-
break of the great European war, a
struggle so titanic that it makes all
others look small.

You live in momentous times, and
you should not miss any of the tremen-
dous events that are occurring.
Another newspaper will inform you
in the promptness and cheapness
of the Thrice-a-Week edition of the
New York World. Moreover, a
year's subscription to it will take
you far into our next Presidential
campaign.

THE THRICE-A-WEEK WORLD's
regular subscription price is only
1.00 per year, and this pays for
56 papers. We offer this unequalled
newspaper and Hopkinsville Ken-
tuckian together for one year for
\$2.65.

The regular subscription price of
the two papers is \$3.00.

Send all subscriptions to Kentuckian
office.

Slavery Originated in the East.
Absolute slavery seems to have ap-
peared in the eastern colonies some
years earlier than in the southern, for
slavery existed in New York in 1628,
in New Jersey in 1628, in Massachu-
setts in 1630, in Connecticut in 1631
and in Delaware in 1638. There was
a statutory recognition of slavery in
Massachusetts in 1641, which was con-
siderably ahead of such recognition
of slavery in Virginia or Maryland.

brary building to cost \$250,000.

EASY TO ASCERTAIN DEPTHS

Alexander Graham Bell Has Scheme
Which May Be Made Use of
in the Future.

Alexander Graham Bell, the in-
ventor, told a class of young students
at Washington recently about put-
ting his head under water and strik-
ing two stones together beneath the
surface. "It sounded as if a man
were hammering for all he was worth
at my ear."

Next, he sent a boy a mile away to
strike the stones, and "the signals
came perfectly clear and distinct."

In these little facts, and the other
fact that sound goes over 5,000 feet
a second through water to its 1,000
feet through air, lay for somebody
the germ of the submarine bell sig-
nals used on ships.

Now, in exploring the earth's sur-
face as it lies under deep waters, a
great deal of time and labor is ex-
pended merely in ascertaining the
depth.

"Why?" asks Professor Bell, as re-
ported in the National Geographical
magazine, "should we not send down
a sound instead and listen for an
echo from the bottom?"—thus ac-
complishing in four seconds a work
now taking sometimes more than
four hours.

And we should learn by the short-
er method something of the nature
of things below. "A flat bottom
should yield a single sharp return,
whereas an undulating bottom should
yield a multiple echo, like that heard
when you fire a pistol among hills."

Seven thousand women practice
medicine in the United States.

Couldn't Stand Everything.

During a case in which the plaintiff
claimed damages from a railway com-
pany on account of severe bodily in-
juries, the company's lawyer was ex-
amining the plaintiff. After awhile
the latter became irritated and said:
"Mr. C., I cannot allow you to question
me in this manner. I am an invalid
on account of the injury received
on the railway. It has affected
my spinal cord, and at this minute I
can see you double. You know, Mr.
C., it is generally enough to upset a
man to see you once."

St. Paul is to have a new city li-
brary building to cost \$250,000.

TERRY COAL & COKE COMPANY PROPERTY SOLD

NOTICE is hereby given to the
Stockholders, Bond Holders and
Creditors of the TERRY COAL &
COKE COMPANY, that an Extension
Sale Contract of its MINES and
PROPERTY at MANINGTON, KY., was
made on the 30th day of March
1915. The property is to be paid for
in CASH, on or before the 10th day
of August 1915. Under the Contract
entered into with the purchaser, all
Stockholders are protected for 20
years, with a special contract where-
by they can buy their Coal at the
mines, under the same terms, and at
the same price, given them, under
their Stockholders Contract with the
TERRY COAL & COKE COMPANY,
carrying out the Order made at the
last general Stockholders Meeting,
by unanimous vote of the Stock-
holders and Bond Holders of the
Company, authorizing, and directing
the Officers of the Company to make
a sale of the property of the Company
as early date as possible, and set-
tle up the business affairs of the
Company. The Purchasers have fur-
nished the money since that date
with which to employ a competent
man to keep the water pumped out
of the Mines and take care of the
Machinery at the mines, and are un-
der contract to do so up to and includ-
ing the month of August 1915, cover-
ing the time they are to take over the
property and pay for it.

The price for which the property
is contracted is sufficient to pay the
Bond Holders in full, and effect a
settlement with the creditors upon
terms and conditions already en-
tered into with Attorneys of the
Company by all the principal credit-
ors of the Company. If the above
sale contract is consummated it is the
best one we have ever been able to
make for the Property, and we trust
will be satisfactory to all concerned.

Yours respectfully,
TERRY COAL & COKE COMPANY,
Incorporated.

By R. E. COOPER, Pres.
L. HAYDON, Sec'y.
May 28, 1915.

REALLY WAS NO MYSTERY

Seeming Puzzle of Two Sunsets in
Two Minutes Easily Explained
After a Little Thought.

A rambler was reading an incident
that had been no part of his planning
for that particular trip:

"It was like one of those moments
the neurotic knows when he
doubts the testimony of his senses and
trembles with the fear that at last
his mind is giving way. But the twain
behind me exclaimed together at the
phenomenon, and I breathed easily
once more."

"Leaving Tarrytown toward five
o'clock on a perfect afternoon, I set-
tled back comfortably to enjoy the
setting of the sun as it traveled with
what seemed undue haste toward a
high peak of the Palisades. Then, as
at a signal, it dropped behind the
peak, leaving a dull brazen trail of its
glory. I shut my eyes, a little dis-
appointed at so hurried a closing of one
of those days when it seems good to
be alive."

"As the train jolted out of Grey-
stone I blinked and beheld in upsetting
wonderment the sun again going down,
this time goldenly, slowly, with a
fitting majesty of motion. Lower and
still lower it sank, until there was
visible only a lovely field of many-
colored amber."

"But two sunsets?"
The difference in altitude of the
cliff towers at various points is the
explanation."

NOTICE

Your Sanitary assessment for
June, July and August is due
June 1st, payable at my office.
Please pay same promptly and
save penalty.

W. R. CRAWLEY,
Sanitary Officer.

More Important Thing.

The latest estimate places the age
of the earth at 100,000,000 years. How-
ever, the age of the earth isn't half
as important to some men as the age of
the liquor they consume.

Itching piles provokes profanity
but profanity won't remove them.
Doan's Ointment is recommended
for itching, bleeding or protruding
piles. 50c at any drug-store.

SUITABLE FOR HUMAN FOOD

Nourishing Plants and Even Insects
Capable of Sustaining Life, at
a Pinch.

According to some reports great in-
genuity in the use of scientific knowl-
edge in extracting food values from
unusual sources is being employed.
the Baltimore Star states. There are
many articles good for human food
and wholesome food at that, which un-
der ordinary conditions are not drawn
upon at all. There are the angle worm,
the grasshopper and fully a score of
plants not ordinarily used as food
which, properly prepared, constitute
nourishing foods. It is perhaps only
the most desperate and resolute sort
of appetite that would stand for the
earth worm, but they have been eaten
even by highly civilized people and
when properly prepared are said to be
not so bad. Why should we be squeamish
about the angle worm when we
eat the oyster, stomach, lungs and ev-
erything but the shell?

As to grasshoppers they were an an-
cient delicacy and are yet so regarded
by many races who know what's what
in the way of good things to eat. All
the grasses that are eaten by animals
have nourishing juices. Clover and
green timothy possess a higher food
quality than cabbage or potatoes.
Boiled to tenderness they would pre-
vent starvation. There have been
famine periods when human beings
have been obliged to eat field grasses
and wild plant roots.

Most disfiguring skin eruptions,
scrofula, pimples, rashes, etc. are
due to impure blood. Burdock Blood
Bitters as a cleansing blood tonic, is
well recommended. \$1.00 at all stores.

DON'T BE MISLED

Hopkinsville Citizens Read and
Heed This Advice.

Kidney trouble is dangerous and
often fatal.

Don't experiment with something
new and untried.

Use a tested kidney remedy.

Begin with Doan's Kidney Pills

Used in kidney troubles 50 years.
Recommended here and every-
where.

The following statement from con-
vincing proof of merit:

T. B. Redd, Cadiz, Ky., says: "Too
frequent passages of the kidney
secretion caused me annoyance and
I had to get up five or six times dur-
ing the night, I had an intense pain
in my back and hips and I could
hardly straighten after stooping. I
was subject to dizzy spells. Doan's
Kidney Pills cured me in a month
and restored me to good health. I
hope that other kidney sufferers
will profit by reading my experience."

Price 50c at all dealers. Don't
simply ask for a kidney remedy—get
Doan's Kidney Pills—the same that
Mr. Redd had. Foster-Milburn Co.,
Props., Buffalo, N. Y.

THE GIRL I'D LIKE TO MEET.

A. DRIGGS.

F. LITTLEJOHNS.

Allegro moderato.

1. Friends, I
2. But when this

now to you will tell, A-bout a girl I love so well, That of my
girl you've chanc'd to meet, You'll nev-er more this song re-peat, You'll find the

fan-ey she's the belle, She's the girl I'd like to meet. Her
peach has lost its sweet, This..... girl you'd like to meet. From

hair is smooth and soft and brown, Her face is ne'er marr'd by a frown, She's the sweet-heart of
boarding-school she just has come, She's live-ly, sweet and full of fun, But her mouth is full
all boys in town, She's the girl I'd like to meet, This girl you'd like to meet, When down the street she'll
gai-ly walk, You'll see the chap-pies stare and talk, And this the cho-rus they re-peat:
Now she's the girl I'd like to meet.

LILLIAN GISH AND ALFRED PAGET IN A SCENE FROM
ENOCH ARDEN FOUR PART MUTUAL MASTERSPIECE
PRODUCED BY MAJESTIC

PRINCESS TO-DAY “ENOCH ARDEN”

Mutual Master Pictures, featuring Lillian Gish, Alfred Paget, Wallace Reid. Based on the famous poem by Lord Alfred Tennyson. Tears will rise, the heart glisten in the eyes as you watch the succession of beautiful scenes in this wonderful motion picture, yet happiness in the key note in the great English Poet's ideal story of love and friendship. Most of this Photoplay is pictured in the open with the ocean and sky as the background, or tropical palms that sheltered the castaway, "ENOCH ARDEN" on the lonely island where he spent ten long years. Don't miss this wonderful Masterpiece to-day. In 4 acts.

Vitagraph Broadway Star Feature in 3 acts. Rose E. Tapley, Lionel Adams Featured

“The Lady of The Lighthouse”

She is known by her good works. They are light and cheer to others and a joy to herself. In this Vitagraph subject you will be more than interested. It's very fine, well acted and a program selected — To-day.

AVERITT IN JAIL HERE

Negro Brought From Tennessee
To Answer a Murder
Charge.

Sheriff Smith turned from Knoxville, Tenn., Sunday night, having in charge Phenie Averitt, col., and the negro was placed in jail to await trial on a charge of the murder of Howard Mimms, col., near Sinking Fork, Dec. 6, last. Averitt was arrested in Knoxville about two weeks ago and he refused to return without requisition from the governor. He was indicted here at the February term of court.

A Negro Hero.

Trenton, Tenn., May 31.—Henry Taylor, a young negro man recently rescued Millie Halford, a 12 year-old white girl, from drowning in Cane creek, near this place, at the risk of his own life. The child had been fishing in the creek, which was very full on account of a heavy rain. She attempted to cross on the railroad trestle, when she became overbalanced and fell into the water below, which was later measured and found to be fourteen and one-half feet deep. Taylor, who was on the bridge, realized the danger and at once sprang in to her rescue. After a struggle of some minutes, in which they sank beneath the surface, he succeeded in bringing her to the bank, where another negro, Sid Sharp, assisted in getting her out of the water.

Friends of the negro are taking steps to have him recognized by the Carnegie hero commission.

TAXES DUE AUGUST 1

Fiscal Affairs of City To Undergo a Complete Change.

The council held a called meeting Friday night and gave a second passage to a new revenue ordinance to conform to the third-class charter. Taxes are due June 1 for 1915 and the penalty will go on August 1 instead of Nov. 1. The penalty will be 2 per cent a month, up to Dec. 1 and 8 per cent per annum after Oct. 1. The city's income is estimated as follows:

Property taxes on \$4,632,286, \$69,499.22, franchises of \$202,611, \$3,039.22, white polls for schools, \$1,947, colored polls for schools \$1,503, licenses \$2,800, fines \$5,000, oiling and sprinkling \$2,400, sale of cemetery lots \$2,000, back taxes \$1,000. Total \$14,388.51.

The estimated expenditures are schools \$23,783.98, colored \$2,822.45, O.V. bonds interest \$200, schoolbonds interest \$6,000, water and lights \$12,000, police \$11,000, fire department \$6,000, salaries \$10,000, public library \$1,500, printing \$500, workhouse \$3,500, Cemeteries \$4,000, tax deficiency \$2,000, charity \$500, streets and sewers \$14,000, incidentals \$16,582.08.

The levy of \$1.50 on the \$100 is divided up into ten parts, proportioned as above.

Lost Brooch.

Lost a diamond brooch about size of a 25 cent coin. Diamond surround by pearls. Reward for return to

Mrs. Geo. W. McKnight.

HELD OVER On Other Charges, After Being Convicted on One.

Johnie Hicks and Herman Brent, colored, were given 152½ and 22½ days respectively in City court Saturday, and each was held to the grand jury on further charges. It is charged that they attempted to take some whiskey from John Hanahan's place of business and when Mr. Hanahan caught hold of Hicks the latter cut him with a knife. It is also charged that later the negroes went to a negro woman's house, and raised a rough house, knocking down two women and cutting a negro man, making a long gash on his head.

BLUE AND GRAY.

Union Veterans Place Flags and
Flowers on Soldiers'
Graves.

A committee from the local Post of Federal soldiers on Sunday afternoon placed flags on the graves of all deceased Union soldiers buried in Riverside Cemetery. Also upon the graves of Confederate soldiers and soldiers and sailors of the army and navy. Yesterday morning the regular Decoration Day exercises were held and flowers were placed upon the graves of the dead of both armies.

The Confederate Decoration Day is June 3.

RUSH STILL ON

To Get The Unsold Tobacco To
Market.

The tobacco men had another busy day yesterday receiving tobacco on the loose floors and this will be another busy week. Practically everybody who has not sold is now hastening to get to market.

The closing of the season at Owensboro, set for Friday, has been postponed for a week, due to rainy weather.

Ulcer Causes Death.

Ben Lanier, of McCracken county, an inmate of the Western State Hospital, died at the institution Sunday of Ulcer of the stomach, aged 68 years. He had been here nine months. The body was shipped to Kevil yesterday.

Buzzard Was Billed.

A balled buzzard was seen on Mr. C. E. Sivley's farm, near Howell, a few days ago. The buzzard alighted in the field and when he arose from the ground the ringing of the bell, attached to some portion of the bird, could be heard distinctly.

Wonder If There Was a Chauffeur? Six centuries ago the Chinese used a vehicle that carried passengers and dropped a pebble in a receptacle to measure every mile that was traversed.

Cleaned up Lettuce Bed.

A thief entered the garden of Mr. Cave Johnson, North Main, Saturday night, and carried off all his lettuce, the bed being stripped.

CHARLES CATLETT Passes Away After an Illness of Several Months.

Charles Catlett, the well-known painter and decorator, died Saturday morning of exhaustion from infection, aged 65 years. He had been ill for several months. Mr. Catlett was a member of the Presbyterian church. His wife and two children survive. The interment took place in Riverside Cemetery Sunday afternoon.

PURELY PERSONAL

Geo. T. Herndon is attending the Confederate Reunion at Richmond, Virginia.

C. F. Jackson, of Casy, accompanied by Mrs Jackson, left Saturday for Richmond, Va., to attend the Confederate Reunion and visit relatives.

Within the next few days a number of Hopkinsville people will leave for San Francisco, Calif. Among them are Miss Mary Penn, Mrs. Geo. H. Taylor, Miss Gladys Taylor, Cooper Weeks, Miss Cornelie Weeks, and Misses Emily and Martha Kelly. Miss Weeks will spend the summer with Mrs. Frank Hoge.

Prof. L. B. Castile has returned from a few days sojourn at Dawson.

Constipation Cured Overnight

A small dose of Po-Do-Lax to-night and you enjoy a full, free, easy bowel movement in the morning. No griping, for Po-Do-Lax is Podophyllin (May Apple) without the griping. Po-Do-Lax corrects the cause of Constipation by arousing the Liver, increasing the flow of bile. Bile is Nature's antiseptic in the bowels. With proper amount of bile, digestion in bowels is perfect. No gas, no fermentation, no Constipation. Don't be sick, nervous, irritable. Get a bottle of Po-Do-Lax from your Druggist now and cure your Constipation overnight. — Advertisement.

Potato and Onion Salad.

Pare and cut potatoes into thin slices, parboil until done but not washed. Drain and pour on a shallow dish. Now take centers of boiled onion rings, mash with a fork, add a sifting of salt and pepper, then mix with enough boiled dressing to make a smooth, rather thick emulsion. Sift salt and pepper over the potatoes, then cover with the dressing and let it stand for an hour to ripen. This is a nice luncheon dish and can be served with rings of hard boiled eggs cured bacon or boiled ham.

Baking Cookies.

If you have difficulty with your cookies, either because they cook too fast on the bottom or are hard to get out of the pan, try using a large dripping pan and placing the cookies on the bottom of the pan rather than in it. Turn the pan upside down, lay a piece of buttered paper or paraffin paper on it and then lay on the cookies. They will cook evenly and there will be no danger of breaking them when taking them off.

Thoroughly Human. Everybody looks at the first name on a subscription list before signing it. Don't know whether it's a human trait or an idiosyncrasy.

NATIVE OF CHRISTIAN

Mrs. Charles Ritter Dies At
Her Home in Oklahoma.

One Among Last Actions Filed
for Approaching Term of
Court.

One among the last suits filed for the approaching term of Circuit Court was that of H. C. Myers, as next friend for Ernest Myers, against the Christian Todd Telephone Company for \$625 damages. It is alleged in the petition that as Ernest Myers was driving along the Greenville road on the night of Jan. 9, last, a telephone wire swinging across the road caught in the top of his buggy, breaking the top off, pulling him out of the vehicle and injuring him seriously.

Neuralgia Pains Stopped.

You don't need to suffer those agonizing nerve pains in the face, head, arm, shoulders, chest and back. Just apply a few drops of soothing Sloan's Liniment; lie quietly a few minutes. You will get such relief and comfort! Life and the world will look brighter. Get a bottle to-day. 3 ounces for 25c., at all Druggists. Penetrates without rubbing. — Advertisement.

Australia is to have bakeries under government control.
